

// GF-MINI JIB

The GF-Mini Jib is a lightweight, stable, compact jib for camera packages weighing up to 30 kg / 66 lbs. It provides smooth, vibration free movements in tight, confined spaces whether working off a dolly or tripod. The complete GF-Mini Jib set fits into one flight case.

GF-7700 GF-Mini Jib consisting of:

- Fixed length front arm
- Crankable counterweight end
- Tilt friction and brakes
- Fitting for double Euro-adapter or extension tubes
- Double Euro-adapter
- 2 counterweight rods

K-1509

Its counterweight arm can be steplessly adjusted by a crank and extended up to a max. of 100 cm. A user-friendly brake attached to the end of the GF-Mini Jib also serves as friction, depending on the tight-ening torque. Most Jib Arm components are made of aluminium and have a very hard and durable surface protection (Hart-Coat®).
